I got this game because it looked cool, but it wasn't worth it at all (still got it on discount tho). It's impossible to play since the mouse jumps uncontrolled all over the place and everything lags in general. Maybe it was a nice game in the past, but it doesn't work on windows 10 properly. It's a pity but whatever, don't waste your money on that one.. I got this game because it looked cool, but it wasn't worth it at all (still got it on discount tho).
